Subject: two things

**PUBLIC  
DOCUMENT**

Hi Victor. I have two things I forgot to talk to you about today:

1. Sandra Collins from Denver Water called. She says that there are two properties that have cracked caps on their outside water meters. They have repaired one on Josephine Street but they don't know who to bill. There is another at 3636 Steele that they haven't yet addressed. She wants to know if they should go ahead and make repairs on these as they find them (she's sending someone out to check all of them in the VB area because she suspects the VB/I-70 work may have caused more than just these two to be broken). The options are that they go ahead and make the repairs and bill us or the homeowner. The other option is that they send a letter to us or the homeowner and have us or the homeowner have the meter repaired ourselves. Her phone number is (303) 628-6152.

2. Also, the meeting with Elbra Wedgeworth is Tues. Oct. 26 at 2:30 at her office. You will have to meet me there because I will be out at other interviews that morning. Her office address is 3280 Downing St., Unit C, Denver, CO 80205.
